

Writer Information Business Process Services

With strong focus on quality, operational excellence and the need to rapidly adapt to new market demands, Writer Information's Business Process Services offers innovative, agile and performance-driven services to deliver measurable impact, and increased business value for our clients.

Our Robotics Enabled Processes are uniquely positioned to monitor process control at various levels that business users need to swiftly and accurately automate rule-based processes in order to drive efficiency and minimize errors within a comprehensive process control framework.

Focus on Quality, Operational Excellence

Customer-centricity Core Value Proposition

Arbitrage, global delivery, process efficiencies, economies of scale.

- Integrated process work and technology platforms.
- Significant technology-(Robotics, Artificial Intelligence) based modernization and automation.

We provide end-to-end, integrated Business Process Services that are robust, reliable and generate immediate bottom-line impact.

Business benefits delivered by our BPS

Reduced TAT's

We develop and deploy a Business Process as a service module that help reduce Turnaround time (TAT) and lead time for the client by over 30%.

Outperform industry-specific SLAs

Our capabilities help clients scale-up their operations by deploying flexible offshore resources to meet day-to-day processing needs and automating systems.

Technology meets Business Intelligence

With the help of advanced technology and human expertise, our technology support helps the client achieve accurate results at faster speed and reduced costs.

E2E Data Process Governance

From front-office to back-office.
